Electric Cleaner

## HOW IT WORKS

Indigo is an electric robot cleaner; it operates off a very low safety voltage power supply and it is completely independent of your pool's filtration system.

The debris sucked up is collected in the Indigo filter bag and does not in any way obstruct your pump basket.

## CLEANING YOUR POOL: WITH INDIGO, NOTHING COULD BE EASIER.

- 1 - Plug the control box into the mains (220/240V).
- 2 - Put your Indigo into the water.
- 3 - Select the cleaning time using your control box.
- 4 - That's it - sit back and relax!

## SIMPLIFIED MAINTENANCE

Indigo requires minimum maintenance: Just empty and rinse the filter bag after each use.

## ZODIAC, MASTERING THE ELEMENTS.
