

The suction technology.

ZODIAC

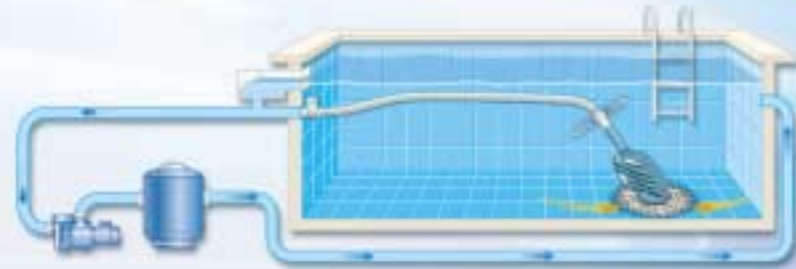

ZODIAC

*manta II*TM
Automatic suction cleaner

HOW DOES SUCTION TECHNOLOGY WORK?

The Manta II uses a filtration system as a source of energy. Easy to install, it connects to the skimmer or the suction point without any need for additional equipment. The power from the pool's pump enables it to move around automatically and at random, to suck up debris, which is then stored in the pump basket and filter.

DIAPHRAGM TECHNOLOGY EXCLUSIVE TO BARACUDA

The diaphragm, which allows the Manta II to move rapidly, sucks up sand, gravel, insects and leaves, etc. efficiently and reliably. In fact, the diaphragm provides wide access for all types of debris.

Furthermore, its diaphragm enables the Manta II to work at a low flow rate (5m³/h) and at a low suction pressure of only 0.2 bars.

ZODIAC, MASTERING THE ELEMENTS.

Renowned worldwide for the quality and reliability of its products in the aeronautical and marine sectors, Zodiac has now brought its expertise to swimming pools, to bring you a full range of pools, automatic pool cleaners and water treatment systems.

Backed by Baracuda technology, expertise and experience, Zodiac brings you the reassurance of top quality equipment in terms of both design and performance.

A real guarantee of efficiency and peace of mind!

Simple
and Efficient.

The benchmark pool cleaner for simply-shaped pools.

Fitted with a diaphragm, exclusive Baracuda technology, the Manta II sucks up all types of debris with amazing efficiency and moves and cleans at maximum speed.

Thanks to the cassette system, exclusive to Zodiac, the diaphragm can be cleaned or changed very quickly.

▶ FOR USE ON WHAT TYPES OF POOL?

- ▶ In-ground pools.
- ▶ Shapes: rectangular or oval.
- ▶ All types of pool surfaces (tiled, liner, polyester skin, reinforced PVC, painted concrete).
- ▶ Flat or gently sloping bottoms.

- ▶ Optional leaf trap available to collect the leaves sucked up by the Manta before they reach the pump basket.

manta™ II, Simple and Efficient.

OPTIMUM TRAVEL :

- ▶ Two deflector wheels are used to ensure that when the Manta II is moving around the pool it doesn't get stuck against the steps or in any of the corners.
- ▶ A hinge for greater mobility: the rotating joint enables the Manta II to move around faster and more efficiently.

SIMPLE AND VERSATILE :

- ▶ The Manta II works in complete safety without electricity.
- ▶ The flow tester enables you to check the optimal Manta II setting at a glance.
- ▶ The Manta II's hose, which consists of ten 1-metre sections, is very strong and suited to all standard pools.

A CLEANER YOU DON'T KNOW YOU'VE GOT!

- ▶ The Manta II is completely silent: Baracuda diaphragm technology doesn't generate any noise.
- ▶ The Manta II can stay in the pool permanently. It cleans tirelessly day and night and can even function, at the same time as the pool's skimmer.

PERFORMANCE GUARANTEED :

- ▶ Its optimal balance ensures that the Manta II adheres perfectly to the bottom of the pool.
- ▶ The Manta II's disc has been specially designed to ensure the complete cleaning of all simply-shaped pools.

manta™ II
Automatic suction cleaner

◀ Easy access to the diaphragm thanks to the cassette system.

▶ The complete cleaning of all simply-shaped pools.

x 10

The Manta II comes with 10 hose sections, a manual flow control valve and a complete set of accessories.
